

BB2G

BORN BETWEEN 2 GENERALS

EDUCATION RESILIENCE COMMAND · 50 STATES + D.C.

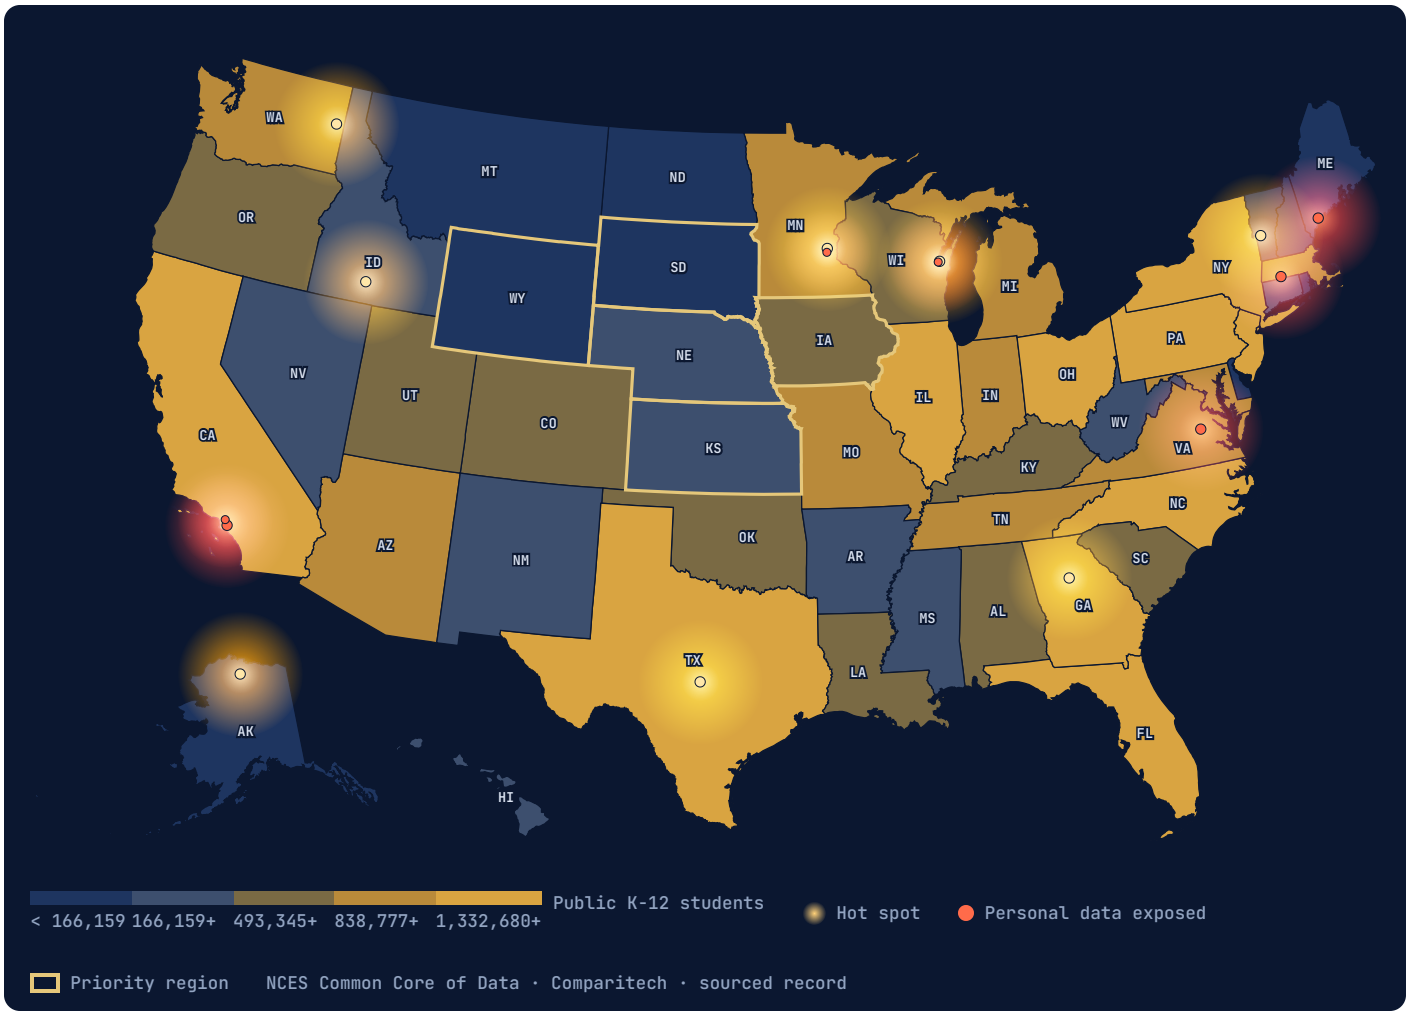

48 MILLION STUDENTS. ONE STOLEN PASSWORD AWAY.

A child's school record holds a home address, birth date, health notes, discipline, parents' names and sometimes a Social Security number, and it follows them for life. Most of it now sits with a handful of vendors. This briefing maps where student data is exposed in every state and shows how BB2G secures it.

Where student records are at stake

States are shaded by public K-12 enrollment. Each glow is a documented ransomware attack, breach or vendor exposure; red marks incidents where student or staff personal data was exposed.

48.5M	~62M	15	9,300
Public K-12 students, 2024–25	Students in the PowerSchool breach, from one stolen password	School data incidents documented across 12 jurisdictions	Confirmed K-12 cyber incidents, July 2023 – Dec. 2024 (CIS)

Vendors are the soft spot

PowerSchool and Canvas each touched tens of millions of students through a single vendor login.

Small districts, big damage

Jerome, Idaho, and Denmark, Wisconsin, lost days of school; Bellflower, California, leaked Social Security numbers.

The priority region

Minneapolis and Spring Lake Park, Minnesota, and five PowerSchool districts in Wisconsin show the Upper Midwest's exposure.

LATEST · 2025 – 2026

What's happening to student data

National breaches and recent district attacks, newest first.

NATIONAL AND VENDORS

NEW May 2026 · national

Canvas attack hits thousands of schools

ShinyHunters breached Instructure's Canvas, used by about 30 million people, and claimed 275 million records from about 9,000 institutions. Instructure struck a deal with the hackers to return the data; it was the company's second breach in a year.

EdSurge

Jan 2025 · national

PowerSchool: one stolen password, about 62 million students

An attacker used a single compromised credential on PowerSchool's support portal, which lacked multifactor authentication, to export student and teacher tables: about 62 million students and 9.5 million educators. PowerSchool paid a ransom.

BleepingComputer

NEW Oct 2026 · national

Education ransomware jumps 54% in the third quarter

Comparitech counted 77 education ransomware attacks in Q3 2026, 31 of them in the U.S., up 182% from the prior quarter. The median ransom demand was $510,000.

Comparitech

Mar 2025 · national

K-12 groups saw 9,300 confirmed incidents in 18 months

The Center for Internet Security recorded 14,000 security events and 9,300 confirmed incidents across more than 5,000 K-12 organizations from July 2023 to December 2024; 82% reported impacts.

Stingrai (CIS MS-ISAC)

PERSONAL DATA EXPOSED

NEW Sep 2026 · Springfield, MA

Interlock claims Springfield Public Schools data

The group claimed student names, ID numbers, grade levels, home addresses, phone numbers, ethnicity and medical information for a district of about 23,500 students.

DeXpose

NEW Jun 2026 · Bellflower, CA

Bellflower Unified notifies 22,802 people after Social Security numbers leak

Rhysida claimed the August 2025 attack and demanded about $1.15 million. Historical student, parent and employee data, including Social Security numbers, was affected.

Comparitech

NEW Mar 2026 · Hanover County, VA

Hanover County Public Schools confirms breach after attempted ransomware

An intruder got into the network and tried to deploy ransomware, potentially exposing student and staff personal information.

BeyondMachines

NEW Jan 2026 · Portland, ME

Portland Public Schools notifies 12,128 people

Maine's largest district found that names, Social Security numbers and financial account details may have been exposed.

ClaimDepot

RANSOMWARE AND OUTAGES

NEW Oct 2026 · Jerome, ID

Ransomware closes Jerome schools for two days

Teachers saw ransom notes on their screens. The district refused to pay on FBI advice, reopened with paper lessons, and the attackers threatened to publish data taken from local machines.

GovTech

NEW Sep 2026 · Spokane, WA

NightSpire ransomware hits Spokane Public Schools

Spokane Public Schools was one of 31 U.S. education ransomware attacks Comparitech counted in the third quarter of 2026.

Comparitech

NEW Sep 2026 · Llano, TX

Qilin ransomware claims Llano ISD

Llano Independent School District was listed by the Qilin group in September 2026.

Comparitech

NEW Sep 2026 · North Slope Borough, AK

INC ransomware claims North Slope Borough School District

The Arctic district was among the K-12 ransomware attacks claimed in September 2026.

Comparitech

NEW Sep 2026 · Rutland County, VT

Kairos ransomware claims Slate Valley Unified School District

The Slate Valley district was claimed by the Kairos group in September 2026.

Comparitech

NEW Jul 2026 · Covington, GA

Qilin ransomware claims Newton County Schools

Newton County Schools was claimed by the Qilin group in July 2026.

Comparitech

NEW Apr 2026 · Spring Lake Park, MN

Ransomware cancels classes at Spring Lake Park Schools

The district shut down its technology systems to contain the attack, canceling classes and activities.

UpGuard

NEW Mar 2026 · Brown County, WI

Denmark School District offline for a week

The district lost internet access for five school days; the INC Ransom group claimed it encrypted about 71 GB of data.

Pulse

THE AUDIT · STUDENT AND STAFF RECORDS

Find every copy of every child's record

The audit follows student data from the classroom to every system and vendor that holds it, and asks who can reach it and how fast it comes back after an attack.

48.5M
Public K-12 students

116
U.S. districts hit by ransomware in 2024 (Emsisoft)

$550K
Cost per day of a fully encrypted district (Comparitech)

WHAT GETS AUDITED

STUDENT INFORMATION SYSTEMS
Enrollment, grades, attendance, health and discipline. Who hosts it, who has admin access, and whether support logins require multifactor authentication.

LEARNING PLATFORMS
Canvas, Google, Microsoft and apps. What student data each one keeps, and for how long.

TESTING AND TIP LINES
Test vendors and anonymous safety-tip services that hold sensitive reports about children.

SPECIAL EDUCATION AND HEALTH
IEPs, counseling notes and nurse records, the most sensitive files in a district.

STAFF AND PAYROLL
Social Security numbers, bank accounts and background checks for every employee.

BACKUPS AND RECOVERY
Offline backups, restore tests and how many school days an attack would cost.

THE FIX · EDUCATION RESILIENCE COMMAND

Lock the vendors, keep the backups, keep school open

Most districts can't staff a security team. BB2G gives every district the same protections and a plan to keep teaching through an attack.

1 Vendor map
Every vendor holding student data listed, with what it holds and its contract terms.

2 Multifactor everywhere
No admin or support login without multifactor authentication, including vendors'.

3 Keep less data
Old student and staff records purged on schedule; Social Security numbers removed where not required.

4 Offline backups
Immutable backups tested each term, so a district restores instead of paying.

5 Teach through it
A paper-and-offline plan so school stays open during an outage.

6 Family notice
Parents told quickly and plainly, with credit freezes for children when needed.

CONNECTED COMMANDS

FAFO APEX INTEL WORKBENCH
Cross-checks vendor, breach and dark-web data for every district.

DATA RESILIENCE COMMAND
Where student data is stored, sold and shared.

CYBER RESILIENCE COMMAND
Ransomware response and recovery.

CHILD AND FAMILY SERVICES
School records for children in foster care, protected and shared lawfully.

THE SHIELD PROJECT
Prevention lessons for students, parents and educators.

VITAL RECORDS
Birth records and Social Security numbers that schools collect.

A CHILD'S RECORD IS FOR LIFE An adult can change a password. A child can't change a birth date or a Social Security number. Student data is kept as little and as safely as possible.

WHY DISTRICTS GET HIT

From one login to every student, twenty links

A district depends on staff, vendors, logins, patches, backups and notices. At 95% per link, the chain holds only 36% of the time.

CHAIN LENGTH	95% PER STEP, NO CHECKS	99% PER STEP, NO CHECKS	95% PER STEP, BB2G CHECKS	99% PER STEP, BB2G CHECKS
10 steps	59.9%	90.4%	99.5%	99.90%
20 steps	35.8%	81.8%	99.0%	99.80%
50 steps	7.7%	60.5%	97.5%	99.50%
100 steps	0.6%	36.6%	95.1%	99.00%
200 steps	0.0%	13.4%	90.5%	98.02%

Chance the chain finishes with no undetected error. With BB2G, every link has a check that catches 99% of failures and alerts a named person.

A DISTRICT'S DATA CHAIN · GOLD STEPS ARE BB2G CHECKS

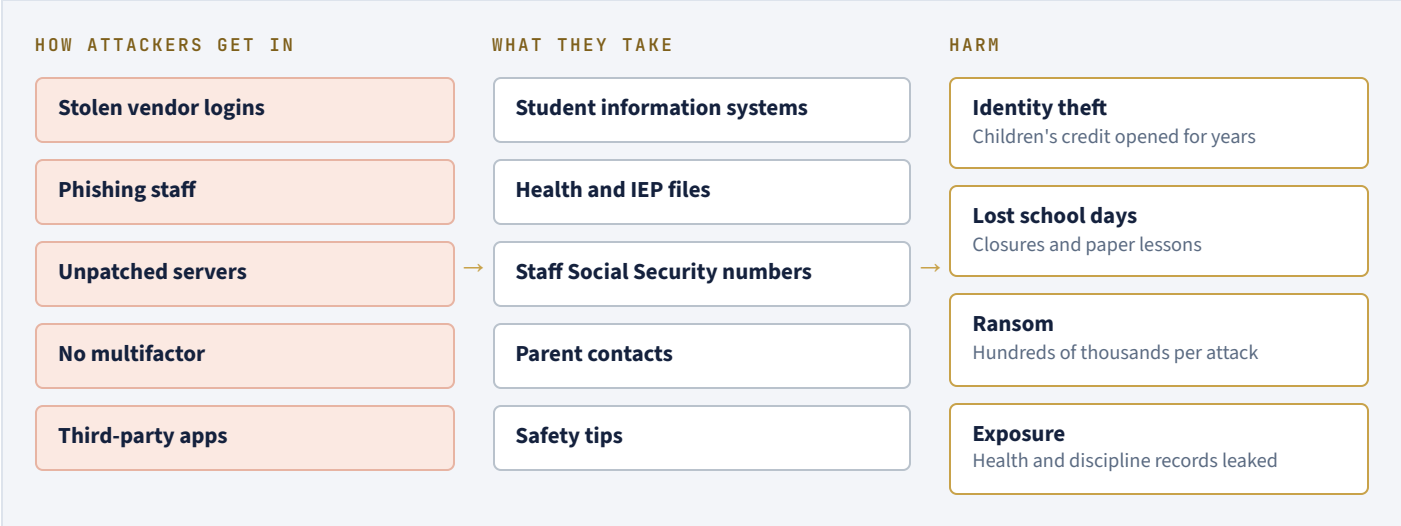

Enrollment · Student information system · Vendor contract reviewed · Vendor support portal · Admin logins · Multifactor required · Learning platform · Test vendor · Health and IEP files · Staff payroll · Old records purged · Email and phishing · Patches · Network · Offline backup tested · Incident response · Family notice · Credit freeze help · Dark-web check · Next term

One vendor login shouldn't open every school PowerSchool showed one stolen password can reach tens of millions of students. Every vendor login is protected and watched.

ENGAGEMENT PLAN

From exposed records to protected students

Start with the vendors, then lock down every district.

PHASE 1 · 90 DAYS

Audit

- Vendor and data map for one state's districts.
- Multifactor and backup check for every district.
- Read-only; no student data leaves the district.

PHASE 2 · 2027

Pilot

- Multifactor and offline backups in a pilot region.
- Teach-through plans and family notice templates.
- Vendor contract standards for student data.

PHASE 3 · 2027 – 2028

Scale

- Statewide vendor standards.
- Records purge schedule in every district.
- Same standards in every state.

BB2G
BORN BETWEEN 2 GENERALS

Decision requested

Authorize a student-data vendor audit for one state's school districts.
