UPDATED NOV. 9, 2026

THREATMAP.BORNBETWEEN2GENERALS.COM

Where the attacks are landing

Every documented public-sector incident plotted where it hit. Glow builds where attacks cluster. Red marks election-system incidents. States are shaded by FBI cybercrime complaints per 100,000 residents.

1,008,597	$20.9B	119	34.9M
Cybercrime complaints to the FBI, 2025	Reported losses in 2025, highest on record	Documented incidents across all 51 jurisdictions	Voter-roll changes a year, 22.2% of ballots

The corridors light up

The Northeast corridor from Virginia to Massachusetts, Texas, the Upper Midwest and the Pacific coast carry the densest clusters.

2026 kept hitting local government

26 documented incidents so far in 2026, 18 of them since Oct. 1, including North Platte and Lincoln County, Neb.

The voter roll is the biggest exposure

34.9 million changes a year must be caught. In October, Texas backlogged nearly 600,000 registrations and Louisiana wrongly marked 67,000 voters inactive.

ELECTION 2026 WATCH · OCT. 1 – NOV. 9, 2026

What happened around the midterm

The November 3 midterm ran without a reported foreign influence operation, but election websites took bot floods, a voter lookup failed, results uploads stalled, and two states' voter files broke in October.

ELECTION SYSTEMS

NEW Nov 2026 · Colorado

Colorado election results website down about 45 minutes on election night

The state's public election results site went down around 7 p.m. Nov. 3 and returned about 45 minutes later with a CAPTCHA. Vendor SOE Software blamed unusually high automated traffic from results-scraping entities, and officials said ballot returns and results were not affected.

Colorado Politics

NEW Nov 2026 · Washington

Washington Secretary of State website hit by cyberattack

Increased traffic over several days made some Secretary of State web pages temporarily unavailable; the pages were restored and the incident is under investigation. A spokesperson said bots caused the surge, and county tabulation machines are not internet-connected and were not affected.

KOMO News

NEW Nov 2026 · South Carolina

SCVotes voter lookup tools fail intermittently on Election Day

Some voters could not get sample ballots and precinct details from the SCVotes website on the morning of Nov. 3. A commission spokesperson cited an intermittent issue with voter-facing features and said capacity was being added to handle traffic.

ROLLBOOK · SECOND LOOK

How BB2G keeps the roll right

Software prepares the evidence. Bipartisan investigators review it. One official decides.

When the list goes wrong

~600,000

Texas registrations backlogged, Oct. 2026

Voting rights groups sued, blaming a glitch in software run by the Texas Department of Public Safety. (Political Wire)

67,000

Louisiana voters wrongly marked inactive, Oct. 2026

Routine database maintenance flipped their status; restored the same day, blamed on human error. (The Center Square)

Full roll

D.C. voter data stolen via a vendor server, Oct. 2023

Officials said attackers may have had access to the full voter roll. (The Record)

100,000+

Alaska voter records taken from online registration, 2020

Names, birth dates, license numbers and partial SSNs exposed. (Alaska Public Media)

Party flips

Riverside County party registrations changed, 2016

The district attorney said hackers altered party affiliations online. (KQED)

Statewide

Illinois voter registration database breached, 2016

Senate Intelligence Committee: Russian military intelligence accessed it. (CBS Chicago)

The Rollbook workflow

1 State rules load first

Signed state election parameters encode the statute, the 90-day federal quiet window and every notice period. Missing rules fail closed and keep the voter active.

2 Live state records

DMV, vital records, courts and tax data check four life events: born, married, moved, died. People-search sites are refused as evidence.

3 Protect the eligible

HOMESTEAD, CITIZEN CHECK and COURTHOUSE confirm real moves, new citizens and restored rights so students, renters and service members aren't wrongly flagged.

4 Bipartisan PI review

One Republican and one Democratic state-vetted investigator review every packet, attest to no conflict and weigh contrary evidence in writing.

5 Two sign-offs, then seal

Two BB2G human-intelligence reviewers check completeness, and the packet is sealed with a SHA-256 fingerprint.

6 One official decides

The state's designated election official reviews the sealed packet against state law and decides alone. No software ever cancels a voter.

Zero auto-cancel Every decision, its legal basis and the state system reference are written to an append-only, hash-chained ledger.

Keeping voter data out of the wrong hands

Minimize

Share only the records a task needs. No bulk voter files, protected fields or unrelated case notes.

Constrain

Written terms ban sale, resale, licensing, onward transfer, advertising and model training.

Control access

Named accounts, hardware keys, least privilege, encrypted storage and logged downloads in one workspace.

WAYBILL

Records every time voter or driver data leaves the state: fields, recipient, legal basis, retention and destruction.

Voter list sales

Enforces each state's rule on who may buy the list, for what purpose and at what price.

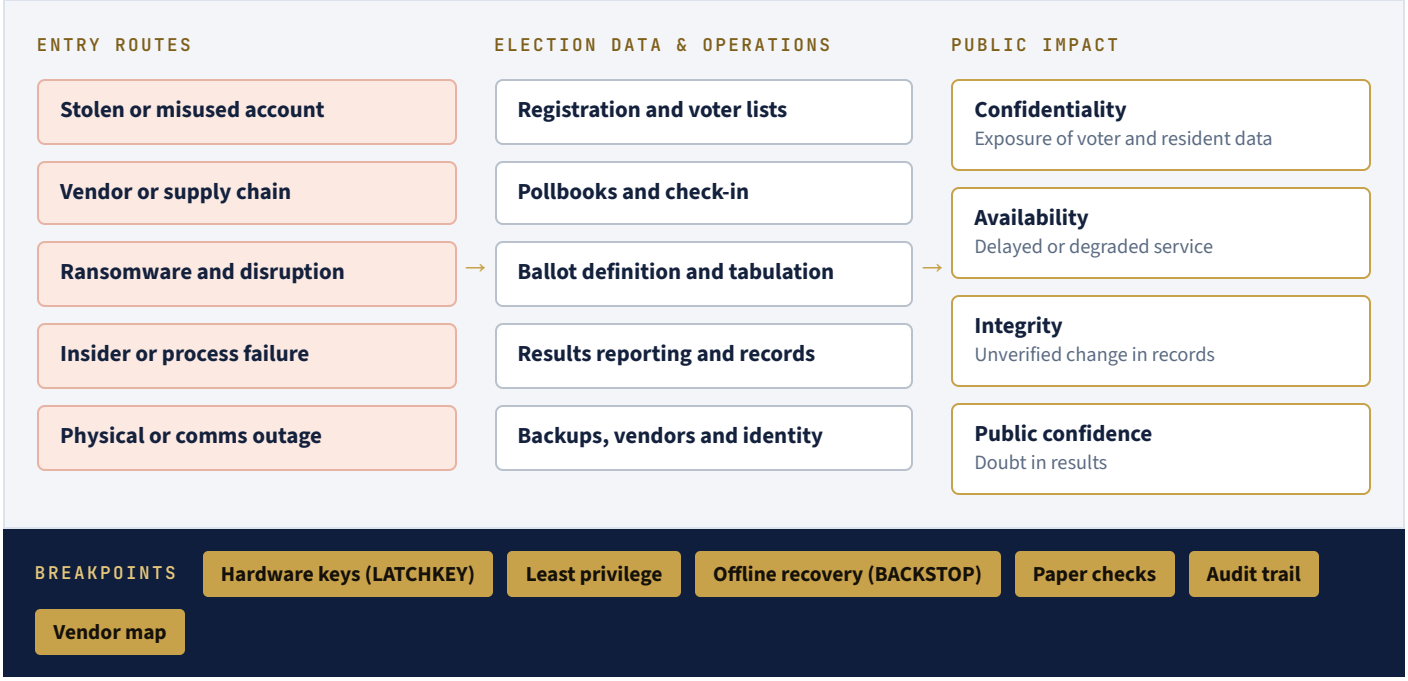

Close the loop

Short retention, verified deletion, preserved audit records and prompt incident reporting.

THREAT PATHWAY

Route to harm, and where to break it

How an intrusion travels from entry point to public impact, mapped to the CISA and EAC election-security framework, with the controls that stop it.

NATIONAL RANKINGS

How every state compares

Ranked by cybercrime complaints per 100,000 residents, 2025. Rank 1 is the highest rate. Priority region shaded.

Sep 2025	**Illinois**	**IDHS maps exposed data on ~700,000 residents for years** Internal IDHS resource-planning maps were publicly viewable on a mapping website because of incorrect privacy settings, exposing addresses, case numbers and other details of Medicaid, Medicare Savings Program and rehabilitation services customers. IDHS found the problem on Sept. 22, 2025, restricted access by Sept. 26, and said it knew of no misuse.	**About 700,000 residents** BleepingComputer
Aug 2025	**Nevada**	**Nevada state offices shut by cyberattack** A cyberattack forced Nevada to close state offices and take state websites offline.	**Statewide outage** ABC News
Aug 2025	**Hawaii**	**Ransomware hits UH Cancer Center, research data of 1.2M exposed** Attackers encrypted and stole Epidemiology Division research files, including Social Security numbers, driver's license data and 1998 Honolulu voter registration information. UHCC paid a ransom for a decryptor and data deletion; patient care was not affected.	**About 1.24M people** HIPAA Journal
Aug 2025	**Maryland**	**Cyberattack disrupts Maryland transit systems, data lost** A cyberattack hit the Maryland Transit Administration, disrupting the MobilityLink paratransit reservation system and real-time arrival estimates. MTA confirmed incident-related data loss in September; core bus and MARC services kept running.	**Paratransit disrupted** The Daily Record
Aug 2025	**Pennsylvania**	**Ransomware takes PA Attorney General's office offline** Ransomware encrypted files and took the office's website, email and phone lines offline, and courts granted extensions in some criminal and civil cases. Attorney General Dave Sunday said no ransom was paid.	**~1,200 staff, 17 offices** Infosecurity Magazine
Aug 2025	**Utah**	**Interlock ransomware steals Box Elder County data, 81,664 notified** Box Elder County found ransomware on Aug. 3, 2025, after unauthorized access that began in May. Interlock claimed 4.5 TB of data, and the county refused to pay and notified 81,664 people about exposed data, including Social Security numbers.	**81,664 people notified** Comparitech
Jul 2025	**Arkansas**	**Cyberattack knocks out Fort Smith schools' phones and internet** A cybersecurity incident left all Fort Smith Public School District communication systems, including phone and internet, unavailable, with no restoration timeline as of July 23, 2025. The district brought in a third-party firm for recovery.	**Districtwide phones, internet down** Talk Business & Politics
Jul 2025	**Maine**	**Cyberattack forces Bar Harbor offline, water plant controls cut** After detecting a cyberattack, Bar Harbor physically disconnected municipal systems, including controls that monitor its water and wastewater plants, and closed the town office. The town froze its bank accounts as a precaution and told employees personal data may have been accessed.	**Town services offline** Bangor Daily News
Jul 2025	**Minnesota**	**Cyberattack on St. Paul prompts National Guard activation** A cyberattack beginning July 25 targeted St. Paul's critical systems and digital services and significantly disrupted city services. Gov. Walz activated the Minnesota National Guard's cyber protection forces, citing an attack beyond the city's capacity to respond.	**National Guard deployed** KTTC
Jun 2025	**Arizona** ELECTION	**Attackers breach Arizona election candidate portal, post Khomeini image** An attacker uploaded code through the Secretary of State's candidate portal and replaced candidate photos on 2016-2024 election results pages with an image of Ayatollah Khomeini. Officials said with moderate confidence that Iran or its affiliates were responsible and that no voter data was accessed; the portal is separate from voter registration and results systems.	**Candidate portal shut down** Votebeat

Sep 2024	**Delaware**	**Ransomware disrupts Delaware public libraries statewide** A ransomware attack on a Delaware Libraries server knocked out internet, computer and some phone services at libraries across the state's 35-site system. A RansomHub affiliate claimed stolen data; officials rebuilt systems rather than pay, and said the patron catalog was not affected.	**35-site system disrupted** The Register
Sep 2024	**Rhode Island**	**Medusa ransomware hits Providence schools, demands $1M** Medusa claimed the attack after the district reported irregular network activity. Internet-connected systems were shut down across the district, and the group demanded $1 million and threatened to release more than 200 GB of data.	**$1M demand, 200+ GB** Rhode Island Current
Aug 2024	**Washington**	**Rhysida ransomware disrupts Sea-Tac and exposes 90,000 people** The Port of Seattle blamed Rhysida for an Aug. 24, 2024 attack that disrupted systems at Seattle-Tacoma International Airport. The Port refused a $6 million ransom and notified about 90,000 people.	**90,000 people** SecurityWeek
Jul 2024	**Florida**	**RansomHub leaks data stolen from Florida health department** A cyberattack on the Florida Department of Health disrupted its vital statistics system for birth and death certificates. RansomHub claimed 100 GB of stolen data and began leaking it after the state refused to pay.	**100 GB claimed stolen** GovInfoSecurity
Jul 2024	**Indiana**	**Ransomware closes Clay County courthouse; disaster declared** A ransomware attack discovered July 9 cut Clay County off from its data and some state partners, closing the courthouse and Health Department and forcing court cases to be rescheduled. The county filed a local disaster declaration; 911 was not affected.	**Courthouse closed** The Record
Jul 2024	**Kentucky**	**Ransomware shuts Jefferson County Clerk's offices for a week** A ransomware attack shut down the Louisville-area clerk's office from July 22 to July 29, closing motor vehicle branches. RansomHub later claimed the attack and said it stole election, motor vehicle and property data; the office had said no data was compromised and did not confirm the group.	**Offices closed ~1 week** Comparitech
Jul 2024	**Ohio**	**Rhysida ransomware exposes data of 500,000 Columbus residents** A July 2024 ransomware attack led Columbus to take critical systems offline, and the Rhysida group claimed it stole 6.5TB of data and posted 3.1TB. The city notified about 500,000 people whose data, including SSNs and bank details, may have been exposed.	**~500K people notified** Infosecurity Magazine
May 2024	**Kansas** PRIORITY	**Ransomware attackers steal personal, medical data from Franklin County** Franklin County said a ransomware attack on its network led cybercriminals to take data on May 19, 2024, including names, Social Security numbers, driver's license and financial account numbers, and medical and vaccination information. The county brought in a forensics team and federal law enforcement.	**Personal, medical data stolen** Insurance Journal
Apr 2024	**Missouri**	**Ransomware hits Jackson County on election day** A ransomware attack disrupted Jackson County systems on April 2, closing assessment, collection and recorder offices, and the county executive declared a state of emergency. The county said its election boards were not affected and voting continued.	**State of emergency** KCTV5
Mar 2024	**Alabama**	**DDoS attacks slow Alabama state government websites** Denial-of-service attacks hit Alabama state government websites in March 2024; the state said its network, data and infrastructure were not accessed or damaged. In October 2024 a federal grand jury indicted two Sudanese nationals alleged to be behind Anonymous Sudan in connection with the attacks.	**State websites slowed** Alabama Political Reporter

DATE	JURISDICTION	INCIDENT	SCALE · SOURCE
Mar 2024	**New Mexico**	**Ransomware locks prosecutors out of files statewide** Ransomware encrypted files on two main servers of the Administrative Office of the District Attorneys, leaving prosecutors without access to their files and disrupting case management. The state's Judicial Information Division warned judges to scrutinize emails from DA addresses.	**All 13 judicial districts** Government Technology
Feb 2024	**Nebraska** PRIORITY	**Change Healthcare ransomware reaches 575,000+ Nebraskans** The attack on the national claims processor exposed data on about 190 million people. Nebraska's attorney general sued after finding at least 575,000 Nebraskans affected.	**575,000+ Nebraskans** Nebraska Examiner
Jan 2024	**Georgia** ELECTION	**Fulton County, Ga., systems taken down** A cyberattack crippled systems in Georgia's largest county, which also runs elections. Repairs were still under way more than a month later.	**Countywide outage** SecurityWeek
Jan 2024	**New Hampshire** ELECTION	**AI-generated 'Biden' robocall urges NH voters to skip primary** A robocall using an AI-generated voice mimicking President Biden told New Hampshire voters to skip the Jan. 23 primary, and it falsely appeared to come from a former state Democratic chair's phone. The NH Attorney General called it an apparent illegal attempt to disrupt and suppress voting.	**Statewide primary targeted** Associated Press (via Boston.com)
Jan 2024	**West Virginia**	**Cyberattack disrupts Beckley city computer network** Beckley announced a cyberattack on its computer network, and the mayor could not say when systems would be restored. The city was still investigating whether any data was affected.	**City network disrupted** The Record
2023			
Nov 2023	**North Carolina**	**Cyberattack leaves Bladen County operating at limited capacity** Hackers accessed Bladen County data, and the county operated in limited capacity without access to some systems. The NC Joint Cybersecurity Task Force was brought in for forensics; life safety services kept running.	**County systems limited** The Record
Oct 2023	**District of Columbia** ELECTION	**D.C. voter data stolen through a vendor server** Hackers took D.C. Board of Elections voter data from a server run by its website vendor. Officials said the attackers may have had access to the full voter roll.	**Full voter roll at risk** The Record
Oct 2023	**Kansas** PRIORITY	**Kansas court system hit by foreign cyberattack** Officials called it a sophisticated foreign cyberattack. Courts in 104 counties were disrupted for weeks, electronic filing went down, and files and case records were stolen.	**104 counties disrupted** WIBW
Oct 2023	**Nevada**	**Unauthorized party breaches Clark County schools email system** Around Oct. 5, 2023, an unauthorized party got into the district's email environment and accessed limited personal information on a subset of students, parents and employees. The district brought in forensic experts, worked with law enforcement and required students to change their passwords.	**Subset of students, staff** News 3 Las Vegas (KSNV)
Jun 2023	**California**	**MOVEit breach exposes data of 769,000 CalPERS retirees** A CalPERS vendor was breached through the MOVEit file-transfer flaw, exposing retirees' and beneficiaries' names, birth dates and Social Security numbers. Officials attributed the theft to Russian cybercriminals; the report names the Cl0p group as behind the MOVEit campaign.	**About 769,000 people** KPBS (AP)
Jun 2023	**Louisiana**	**MOVEit breach exposes records of nearly every Louisiana driver** Hackers breached the OMV's MOVEit file transfer system, exposing names, addresses, license photos, height and weight. The OMV believes everyone with a state license, ID or vehicle registration likely had data exposed.	**6M+ records** WAFB

Jun 2023	**Missouri**	**MOVEit breach via IBM exposes Missouri Medicaid data** Data was stolen through a MOVEit vulnerability in a tool IBM used for DSS, exposing Medicaid participants' names, client numbers, birth dates and claims data. DSS planned to notify all Medicaid participants and providers enrolled in May 2023.	All Medicaid enrollees The Record
Jun 2023	**Oregon**	**MOVEit hack exposes 3.5M Oregon driver's license records** Attackers exploited the MOVEit file transfer tool used by ODOT and accessed files with names, license or ID numbers, birth dates, addresses and partial SSNs. The data covers about 3.5 million current Oregon license and ID holders; Cl0p claimed the MOVEit attack.	3.5M records Oregon DOT (official notice)
May 2023	**Colorado**	**MOVEit breach exposes data of 4 million Colorado Medicaid members** An unauthorized party accessed HCPF files that service provider IBM was transferring with MOVEit, exposing names, Social Security numbers, medical and insurance information of Health First Colorado and CHP+ members. HCPF said its own systems were not impacted.	About 4.1M people SecurityWeek
May 2023	**Maine**	**MOVEit breach hits roughly the entire population of Maine** Attackers exploited a zero-day in the state's MOVEit server on May 28-29, stealing files tied to health and human services, education, motor vehicles, corrections, unemployment and other agencies. Maine disclosed in November that about 1.3 million people were affected.	1.3M people Cybersecurity Dive
May 2023	**Texas**	**Royal ransomware shuts Dallas courts, disrupts police systems** The city said the Royal group was behind a ransomware attack that significantly affected police operations, including computer-aided dispatch, and closed municipal courts. The 311 site and utility payments also went down, while 911 dispatch stayed operational.	Courts closed, police CAD down Dallas Morning News
Apr 2023	**Montana**	**Cyberattack on MSU brings in Montana National Guard** A cyberattack hit Montana State University's Bozeman and Great Falls campuses on April 19. The National Guard's cyber team helped isolate the threat and keep it from spreading.	Two campuses affected NBC Montana
Apr 2023	**South Carolina**	**Ransomware attack disrupts Spartanburg County IT and phone systems** A ransomware attack limited Spartanburg County's IT and phone systems. 911 and emergency communications kept running, and the state Judicial Branch said its systems were not affected.	County IT, phones limited The Record
Mar 2023	**Tennessee**	**Ransomware attack takes Oak Ridge city network offline** A ransomware attack hit Oak Ridge, a city of about 31,000, taking down its network and website. Police and fire stayed reachable by phone while the city worked with law enforcement and recovery specialists.	City network, website down The Record
Feb 2023	**Minnesota**	**Medusa leaks Minneapolis schools data after $1M demand** The Medusa ransomware group attacked the district, demanded $1 million, and posted stolen data when it refused to pay. The leak reportedly included student records, health and disciplinary files, addresses, and payroll data.	34,500-student district The Record
Feb 2023	**West Virginia**	**Cyberattack cancels classes for 20,000 Berkeley County students** A cyberattack caused internet and phone outages at West Virginia's second-largest school district, and classes were canceled for nearly 20,000 students. The district said it did not know at the time whether personal data was breached.	~20,000 students out The Record
Jan 2023	**Iowa** PRIORITY	**Des Moines Public Schools hit by ransomware** Iowa's largest school district took its network offline after a ransomware attack. Personal data of nearly 6,700 people was taken.	~6,700 people District Administration

DATE	JURISDICTION	INCIDENT	SCALE · SOURCE
Jan 2023	**Hawaii**	**Stolen login used to access Hawaii death registry records** Credentials for an unused external death certifier account were sold on the dark web and used to access the state's Electronic Death Registry System. Records exposed names, Social Security numbers, addresses and causes of death; the attacker has not been identified.	About 3,400 records The Record
2022			
Dec 2022	**Iowa** PRIORITY	**Hack at records vendor cuts Iowa counties off from land records** Cott Systems, an Ohio company that hosts public records for government agencies, appears to have been hacked over the holidays, and the FBI was reportedly investigating. Iowa county recorders, including Dallas County, lost access to real estate records, and the system had not been fully restored by early January 2023.	300+ agencies, 21 states Iowa Capital Dispatch
Nov 2022	**Arkansas**	**Vendor cyberattack takes Arkansas county offices offline** A cyberattack on Apprentice Information Systems, which stores data for county tax collector, assessor, clerk and treasurer offices, led many Arkansas counties to take systems offline. Boone County's collector issued handwritten receipts while systems were down.	Many county offices offline KY3
Nov 2022	**Mississippi** ELECTION	**Election Day DDoS knocks Secretary of State sites offline** On Election Day, a DDoS attack intermittently made public-facing Secretary of State websites unavailable. The office said the election system was not compromised and did not attribute the attack.	Intermittent outage Mississippi Secretary of State
Oct 2022	**Kentucky** ELECTION	**Pro-Russian DDoS knocks Kentucky elections and courts sites offline** A denial-of-service attack took down several Kentucky state sites, including the Board of Elections page, the Department of Education site and state court websites. The pro-Kremlin group Killnet claimed responsibility; the state's vendor said there was no evidence data was compromised.	Sites down ~1 day Louisville Public Media
Sep 2022	**New York**	**BlackCat ransomware cripples Suffolk County government** Attackers entered through the county clerk's office via Log4j in December 2021 and deployed ransomware in September 2022, disabling email for over 10,000 workers and forcing dispatchers to take calls by hand for weeks. About 400GB of stolen data was leaked; the BlackCat/AlphV group claimed the attack and the county did not pay.	~$5.5M cost; 400GB leaked The Record
May 2022	**New Jersey** ELECTION	**Ransomware hits Somerset County weeks before NJ primary** Ransomware disabled Somerset County's email server and other services, which affected the county clerk's office and could slow mail-in ballot requests before the June 7 primary. Officials said the systems used to cast, process and count ballots were not affected.	County email, services down StateScoop
Jan 2022	**New Mexico** ELECTION	**Ransomware halts Bernalillo County voter registration, jail locks** A ransomware attack discovered Jan. 5 took county systems offline, and the clerk's office could not register voters, issue marriage licenses or approve deed transfers. At the Metropolitan Detention Center, electronic cell locks and cameras failed and the jail was locked down.	Countywide; weeks of disruption TechTarget
2021			
Dec 2021	**Virginia**	**Ransomware hits Virginia legislature's IT agency, websites** A ransomware attack hit the Division of Legislative Automated Systems and spread to nearly all legislative websites. The director said most of the state's critical systems were locked, and a ransom note was received.	Legislative IT shut down UPI

Sep 2017	**Montana**	**School network hack closes 30+ Flathead Valley schools** A hacker breached the Columbia Falls district's system and used the data to send threats to students and families to extort money. More than 30 schools canceled classes; authorities named The Dark Overlord.	**15,000+ students home** CBS News
Sep 2017	**Wisconsin** ELECTION	**DHS confirms Russian hackers targeted Wisconsin in 2016** DHS told Wisconsin that Russian hackers scanned state computer systems in 2016 and tried to place an ad linking to a suspicious IP address on a state computer. The Elections Commission said no systems were hacked and no voter records or votes were changed.	**Attempts, no breach** WPR
Mar 2017	**Vermont**	**Joblink breach puts unemployment filers' SSNs at risk** A breach of Joblink, the job-search database Vermont unemployment filers must use, may have exposed Social Security numbers. The vendor, America's Job Link Alliance, said more than 180,000 accounts were compromised, including tens of thousands of Vermonters.	**180,000+ accounts** Vermont Public
2016			
Nov 2016	**Indiana** ELECTION	**Ransomware halts online posting of county election results** A ransomware attack disabled the server Madison County used to post election results online, so the clerk's office tallied by hand and handed out printed results. Officials said votes cast were not affected; the county paid the ransom on its insurer's advice.	**Results site offline** Meridian Star (AP)
Nov 2016	**South Carolina** ELECTION	**Nearly 150,000 attempts to penetrate S.C. voter registration system** South Carolina's voter registration system saw nearly 150,000 attempts to penetrate it on Election Day 2016. A later DHS scan requested by the state found 55 vulnerabilities on four State Election Commission devices.	**~150,000 attempts** GovTech (via The State)
Jun 2016	**Illinois** ELECTION	**Illinois voter registration database breached** Russian military intelligence officers accessed the Illinois State Board of Elections voter registration database, according to the Senate Intelligence Committee. State officials notified affected voters.	**Statewide voter rolls** CBS Chicago
Jun 2016	**California** ELECTION	**Riverside DA: hackers altered voters' party registrations in 2016** The Riverside County District Attorney said hackers accessed the state's online voter registration system and changed some voters' party affiliations, causing confusion at the June 2016 primary. The perpetrators are unknown, and the Secretary of State's office said it had no evidence of a breach of its database.	**20 formal voter complaints** KQED
2016	**Arizona** ELECTION	**Malware attempt via Gila County targets Arizona voter database** A Gila County elections worker opened a malicious email attachment in an attempt aimed at servers holding about 4 million voters' records; the FBI alerted the Secretary of State, who said the voter database was not breached. Experts cited in the report believed the Russian government was responsible.	**4M voter records targeted** CBS News
2016	**Connecticut** ELECTION	**Russian agents targeted Connecticut voter registration system** DHS notified Connecticut that its online voter registration database was one of 21 states' systems targeted by Russian agents before the 2016 election. The Secretary of the State said the state's intrusion detection system stopped the attempt.	**Attempt blocked** Connecticut Secretary of the State
2016	**Delaware** ELECTION	**Russian hackers attempted to access Delaware voter registration** DHS told Delaware it was among 21 states hit by attempts to access voter data before the 2016 election. The state elections commissioner said the attempts on the voter registration system were unsuccessful.	**Attempt unsuccessful** Delaware Public Media

DATE	JURISDICTION	INCIDENT	SCALE · SOURCE
2016	**Florida** ELECTION	**Russian-linked hackers accessed voter data in two Florida counties** Gov. Ron DeSantis said in 2019 that Russia-affiliated actors accessed voter databases in two counties in 2016 via phishing emails posing as vendor VR Systems. He said the data was publicly available and the breach did not affect votes or results; the counties were not named.	**2 county voter databases** WFSU

BRIEFING VISUALS

Show the risk, then the response

01 · Data pathway

Entry routes meet protective checkpoints before reaching public records.

02 · Service continuity

A degraded digital service beside a working paper continuity path.

03 · Account access

Misused credentials stopped; authorized access passes.

04 · Vendor boundaries

A monitored vendor route and an available alternate path.

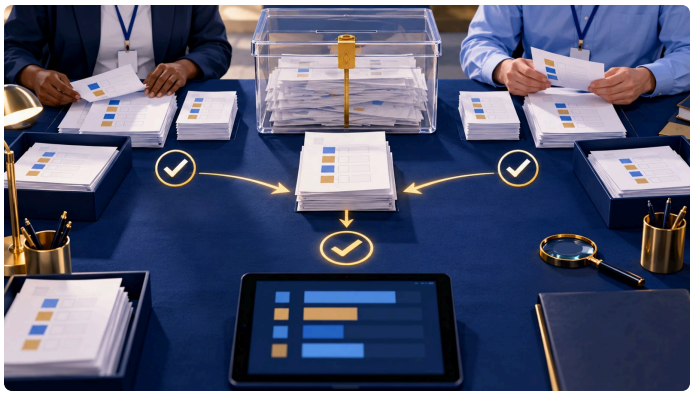

05 · Chain of custody

Independent handling and sealed evidence make review possible.

06 · Physical continuity

Paper procedures and backup radios keep a local office running.

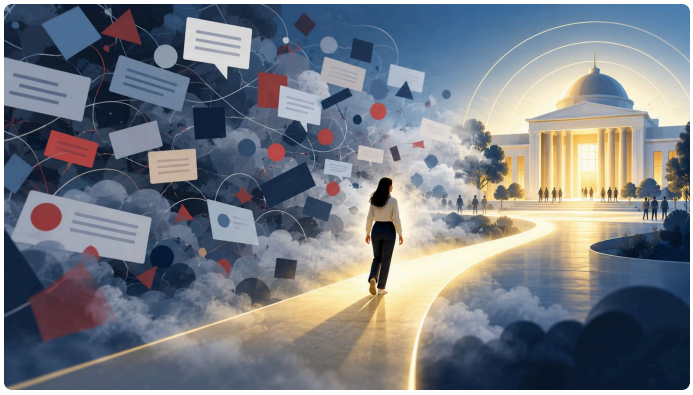

07 · Integrity checks

Bipartisan paper-based checks support reconciliation.

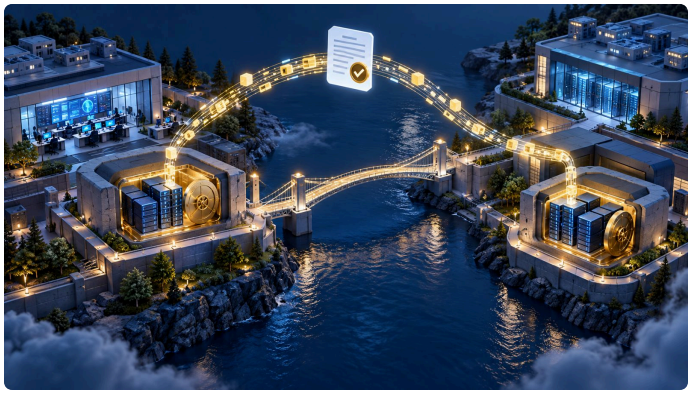

08 · Data privacy

Sensitive records stay sealed; only a minimal exchange moves.

09 · Public information

Clear official communication cuts through noise.

10 · Recovery architecture

Separated backup sites linked by a tested recovery bridge.

ENGAGEMENT PLAN

From public-record watch to proven recovery

Nothing interrupts an active count. Work starts after certification and scales state by state.

PHASE 1 · THROUGH CERTIFICATION

Public-record watch

- The state signs a watch authorization and names one point of contact.
- PICKET watches public records only and touches no live state systems.
- Nothing is asked of election staff during certification.

PHASE 2 · AFTER CERTIFICATION

Map, drill and review

- Vendor lists and contracts feed the ERC Master Map.
- First timed restore drill on synthetic data.
- ROLLBOOK voter-roll reviews launch outside the federal quiet period.

PHASE 3 · 2027 – 2028

Scale and harden

- Vendor lockdown, canvass checks and BB2G Academy training.
- State-selected Ballot Stock Ledger versions for 2028.
- Same recovery and custody measures in every state.

BB2G
BORN BETWEEN 2 GENERALS

Decision requested

Authorize a scoping session to set the evidence, owners, safeguards and success measures for a readiness assessment.
